HOW YOUR COMPANY/ORGANIZATION CAN HELP

The success of our science outreach efforts relies on the support of communities, businesses and people like you. We are grateful for the financial assistance we have received from our sponsor companies and individual citizens who understand and appreciate the importance of high quality science and math education for our children.

Our programs provide unique opportunities for students, teachers, parents and others to engage in science through contact with working scientists, oceanographers, astronauts, meteorologists, and others who are deeply involved in science. We also provide “field experiences”, hands-on science activities, displays, and exhibits to stimulate and enhance scientific knowledge, provide unique science experiences and increase awareness of earth-space sciences. Additionally, each of our programs features a highly prominent scientist and/or educator in the sciences.

This is your opportunity to participate in a high quality program that is focused on enhancing and bringing awareness to Science, Technology, Engineering, and Math fields. Research has shown that, science focused educational events are needed to increase awareness of scientific discovery and to sustain the need for future scientists. The earth, space, technology, engineering and biological technology related career fields are not reaching enough students to fulfill our future needs for scientists.

Oceanarium, Amazing Skies, WeatherQuest and ACCELERATION are science focused outreach efforts designed to appeal to families, educators, and students, in particular, minority students, as they comprise a significant and growing portion of our total population. Students who are given the opportunity to have real-life, hands-on experiences doing science and are exposed to science education programs, have a higher probability of going on to careers in science that could lead to significant discoveries and exciting scientific exploration.

We need the support of businesses and individuals like you to assist us in our quest to provide high quality science and math experiences for students, teachers and parents. We are a 501c (3) non-profit organization and all funds are tax deductible. We encourage all our supporters to become active participants in our events. We look forward to your support and participation in one or all of our events.
